# Kiarash Shahlaie, M.D., Ph.D.

**Philosophy of Care**

Dr. Shahlaie believe that his patients and their family members should be well informed about their treatment options, and receive the most advanced care available.

**Clinical Interests**

Dr. Shahlaie is a fellowship-trained neurosurgeon that specializes in complex cranial surgery. He is an expert in management of brain tumors, meningioma, skull base and pituitary tumors, trigeminal neuralgia and hemifacial spasm, epilepsy, and movement disorders such as Parkinson's disease, essential tremor, and dystonia.

Dr. Shahlaie has advanced training in Minimally Invasive Brain Surgery, which includes endoscopic and keyhole techniques. He is also an award winning instructor at the UC Davis School of Medicine, and directs an innovative research laboratory at the Center for Neuroscience.

**Research/Academic Interests**

Dr. Shahlaie is an accomplished researcher with extensive experience leading pre-clinical and clinical research. Dr. Shahlaie directs the Bronte Research Laboratory at the UC Davis Center for Neuroscience, where his team is developing new brain stimulation techniques to improve learning and memory function.

Dr. Shahlaie also directs numerous clinical studies at the UC Davis Medical Center, including trials of brain stimulation therapy to improve cognition. Dr. Shahlaie and his research team have published over 105 peer-reviewed articles and 15 book chapters, and his work has been presented at numerous national and international scientific and clinical conferences.
