**Philosophy of Care**

I truly appreciate establishing a partnership with both my patients and their families- open communication lines ultimately make for the best patient care. I feel that being educated regarding your condition can make you your own best advocate - you should ask questions about your care so that you can be in charge of your outcomes. Every person and situation is different, so I strive to recommend management plans which are tailored to the best interest of all the parties who are involved.

**Clinical Interests**

Dr. Dimitriades sees patients with allergic concerns, such as Food allergy, Seasonal allergies, Drug reactions, Stinging insect reactivity, Recurrent hives, Allergic asthma, and Atopic dermatitis. Additionally, she has a special clinical interest in patients with concerns for Immune deficiency, Recurrent/severe/unusual infections, Low Immunoglobulins, Immune dysregulation diseases, or a Family history of immune deficiency. She is also involved with immune evaluations for the California Newborn screening program and for patients with various genetic syndromes, in particular 22q deletion syndrome.

**Research/Academic Interests**

Dr. Dimitriades' research interests include specific antibody deficiency and immune dysregulation syndromes with immune deficiency. Additionally, she is involved in quality improvement initiatives pertaining to food and drug challenges.
